# A wise decision to use Prowise

## First mover advantage

It is the first and only ISP brand to be manufactured by a 'Make in India' initiative, Shiv Health Foods LLP using fully automated and imported technology.

## Made in India advantage

Since it is a complete "Made in India" brand, buying Prowise translates into lower logistic cost and time, less purchase planning time, no import duty and no custom formalities. It is hassle-free and saves time and money.

## 100% non-GMO assurance

The product is made from indigenous soybean and is hence 100% non-GMO. In spite of this, frequent quality checks are carried out to maintain the non-GMO status.

## Seamless integration. International quality

From working with over 50,000 farmers to ensure the best yield from seed to processing as per global standards, every step is managed by the same parent company committed to providing international quality products.

## Environment sustainability

By ordering a "Made in India" product, the carbon footprint is minimised because of a huge reduction in transit time and cost. Plus, all Prowise facilities uses sustainable practices at every step to reduce environmental impact.

## Applications

Isolated Soy Protein, a highly purified form of soy protein, has a neutral flavor and mixes well with other flavorful ingredients and products to increase protein content, enhance moisture retention and improve texture.

### It is used extensively in the following areas:

- Nutraceutical Industry (Major ingredient of Protein powders)
- Instant and/or agglomerated products
- Meat analogues
- Vegan foods
- Pharmaceutical products
- Bakery and fine pastry
- Dry bakery products
- Convenience food (e.g. pizzas, sauces, cereals, noodles, ice cream and bars)
- Snacks

## Product specifications

Protein (mfb)	90% minimum
Moisture	6% maximum
Standard plate count	10,000 maximum
Salmonella (per 375 g)	Negative
E. coli (per g)	<3 cfu/g

### Packaging

20 Kg brown paper HDPE bag with liner inside.

### Shelf life and storage

Prowise will store for 18 months under ideal conditions in a cool, dry place.
